

# Recycled Content

---

Gage Architectural Products are manufactured utilizing various raw materials which contain varying amounts of pre-consumer recycled material. Listed below are our products with their typical recycled content.

## Gage Ceilings

---

The aluminum used to manufacture Gage Ceilings panels has at least 50% pre-consumer recycled content.

## Gagecast

---

The MDF backer has a 100% pre-consumer recycled content. The aluminum backer has a minimum of 50% pre-consumer recycled content.

Various metal powders are used in the manufacture of Gagecast. Copper based powders (Bronze, Copper, Brass, and Nickel Silver) have at least 65% pre-consumer recycled content. Aluminum has at least 60% pre-consumer recycled content. Zinc, Tin, Stainless Steel, and Dark Stainless Steel all have a minimum of 50% pre-consumer recycled content.

## GageMetal

---

Aluminum, Stainless Steel, Bronze, and Brass have at least 50% pre-consumer recycled content.

## GageWoven

---

Recycled content will vary depending on metal used, but all metals will have at least 40% pre-consumer recycled content.

## Gage Steel Floors

---

Pre-consumer recycled content is a minimum of 40% dependent upon pattern.

## GageCarve

---

The aluminum used to craft GageCarve contains at least 50% pre-consumer recycled content.
